# How governments can use AI to improve resilience

02

AI-powered narrative intelligence

Osavul's **Narrative AI** © analyzes millions of messages across websites, online communities and social media. It identifies emerging narratives, information risks, FIMI, the events fueling them, and the opinions people are sharing.

Look beyond classical social listening

Osavul collects data from online communities and emerging social platforms where people actually talk about your product. Our AI can analyze **conversations** and **videos** to bring valuable insights

04

Trusted by governments, NGOs and researchers

Our platform is used by 15 government agencies globally to combat disinformation.
We provide military-grade quality when it comes to security and reliability.

05 | 3 pillars of information resilience

1

Situational
awareness

2

Threat Intelligence /
FIMI

3

Threat Sharing

osavul

06

Situational awareness

1

Which narratives spread in your society

2

Which narratives spread among allies and adversaries

3

Who spread these narratives

07

Threat Intelligence / FIMI

1

What kind of threats are targeting us

2

Who initiated these attacks

3

What should we do about that

osavul

08 | Threat Sharing

1

Sharing knowledge between institutions and NGOs

2

Sharing insights from state to state

3

Making more effective collective response
