DEMOCRACY

Fostering Socially Fair and Ambitious NECPs in Central and Eastern Europe

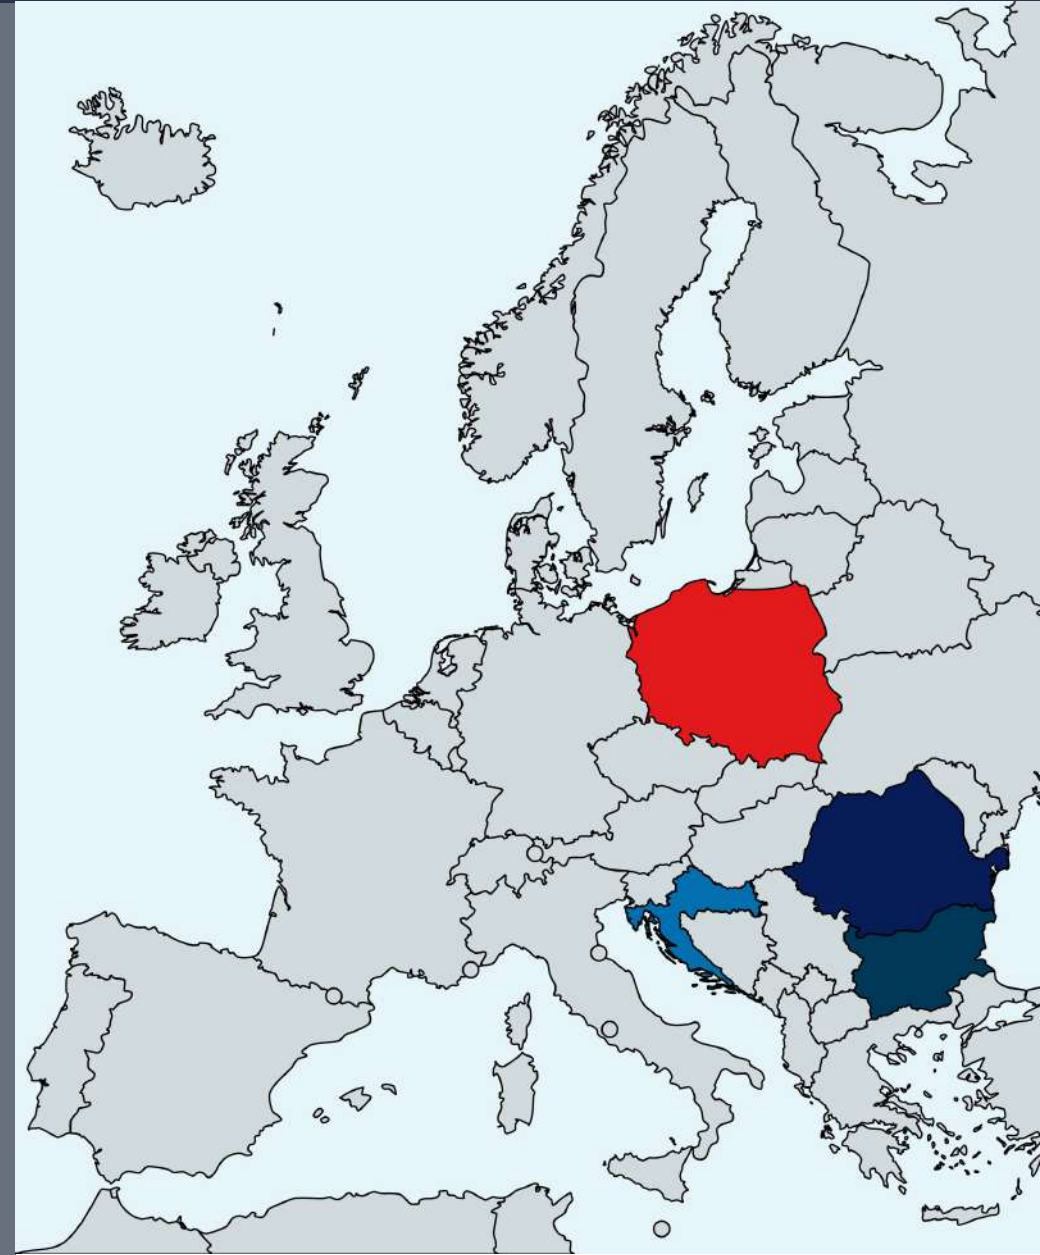

Energy and Climate Program
Center for the Study of Democracy

15 May 2024

Agenda

1. NECP Revision in CEE: Governance Deficits and Stakeholder Engagement
2. Overcoming the Implementation Gap for More Effective Energy Transition
3. Intersections between the NECP and Energy and Climate Security
4. Synergies of NECP Targets and Ambition with NRRPs, TJTPs and SCPs
5. What's Next?

NECP Revision in CEE: Governance Deficits and Stakeholder Engagement

REVNECP – Fostering Ambitious and Effective NECPs in CEE

- I. Comparative Monitoring and Evaluation Matrix – identifies challenges in updating NECPs and provides policy recommendations.
- II. Energy and Climate Security Risk Index – assesses the conformity of NECPs with EU regulations and evaluates their impact on energy and climate security.

Stakeholder Engagement in the Revision Process of the NECPs: Common Trends

- Consulting only a limited range of stakeholders.
- Little to no involvement of local authorities.
- Lack of information for the public.
- Consultations at later stages, without sufficient time for analysis.
- No clearly integrated stakeholder feedback in the final documents.
- A tick-box exercise.

Overcoming the Implementation Gap for More Effective Energy Transition
